

RADIOGRAPHY REPORT

Horse: RENEWABLE, chip: 208213999050838

IMAGING OVERVIEW

X-ray examination of legs incl carpus

REMARKS

OCD on the lateral trochlea right hind

OCD mediale malleolus left hind

VETERINARY ASSESSMENT

Based on a veterinary assessment, there is an increased risk that the horse's X-ray status will have an impact on the horse's future use.

It is considered that it is recommended to operate on the horse. After which there is a normal risk

PREREQUISITES FOR THE ASSESSMENT

It is assumed that the horse is intended for trotting.

The assessment was made by veterinarian Martin Hjorth, Højgård Heste Hospital

Disclaimer

1.1 The veterinarian's possible liability to the requester of this second opinion is in all cases subsidiary to the claimant's claim against any counterparty in a transaction
1.2 If the requester wishes to make a claim against the veterinarian, the requester must inform the veterinarian without undue delay, however, the requester is first required to make a claim against the other party, cf. 1.11.3
1.3 The veterinarian cannot be held liable for indirect loss or consequential damage
1.4 The veterinarian's possible liability for damages to the requester may in no case exceed an amount sv.t. 90% of the purchase price for the horse - however, a maximum of DKK 2 million.
1.5 Claims from the applicant can only be directed against the veterinary company and not against the veterinarian personally.

Kind regards

Martin Hjorth, DVM
